

John Beardwood

Santa Cruz | 805-440-1296 | jfwbeardwood@gmail.com | github.com/jbeardwo

OBJECTIVE

IT professional and Computer Science graduate with certifications in Deep Learning and Machine Learning, transitioning into AI-focused software engineering. Brings hands-on experience in systems infrastructure, automation, technical problem-solving and software design. Eager to contribute expertise in Python, AI deployment, and problem-solving to help build scalable AI solutions at Supermicro.

SKILLS

Languages: Python, JavaScript, Java, C

ML/AI: Deep Learning, Data Preprocessing, PyTorch, TensorFlow, fastai (framework)

Frontend: HTML/CSS, WebGL/OpenGL, React

Systems & Infrastructure: Windows, UNIX/Linux, Networking, Wireless

CERTIFICATIONS AND COURSES

- Deep Learning, DeepLearning.AI — Issued Jun 2025
- Machine Learning Specialization, Stanford/DeepLearning.AI — Issued Nov 2024
- fast.ai Practical Deep Learning for Coders — Ongoing
 - o Course focused on model deployment, transfer learning, and building real-world AI systems using PyTorch.

EXPERIENCE

New Leaf Community Markets / Good Food Holdings

Santa Cruz, CA

IT Technician

June 2022 - Present

- Managed IT equipment, software, and facilities across 6+ locations including diagnosis of complex technical issues in networking, software, and hardware.
- Provided collaborative and direct support to the additional 4 companies within Good Food Holdings and their 63 total stores.
- Assisted with evaluation, integration, and deployment of new technologies across internal systems.
- Balanced reactive troubleshooting with long-term IT improvement projects.

Cruzio Internet

Santa Cruz, CA

Systems Administrator / Infrastructure Operations

Jan 2020 – Sep 2021

- Expanded a regional ISP network through planning and construction of wireless infrastructure sites.
- Completed hardware and software configuration of long-range wireless and networking devices.
- Responded to infrastructure outages with swift, targeted solutions at both software and hardware levels.
- Utilized knowledge of industrial tools and construction practices to physically construct infrastructure.

PROJECTS

Music Theory Keyboard – Full-Stack Web Application

- Developed an interactive educational web app using JavaScript, Web2Py, and HTML/CSS.
- Managed project in a team environment using GitHub and Scrum methodologies.

Surface of Rotation Renderer – Graphics/Math Application

- Built a 3D rendering tool in WebGL that generated 3D objects from 2D user-drawn input.
- Applied linear algebra to manage 3D objects' movement, lighting, and texturing.

EDUCATION

University of California, Santa Cruz

Santa Cruz, CA

Bachelor of Science in Computer Science

December 2018

Bachelor of Arts in Music
